Open: Monday-Friday 8:00am to 5:00pm

### **MISSION STATEMENT**

Pacific Coast Sign Supply® is dedicated to providing exceptional customer service and superior technical support to our customers. Being family owned and operated, we understand your needs and are committed to helping you and your business succeed!

### **WELCOME**

Thank you for choosing Pacific Coast Sign Supply®. Established in 1962, Pacific Coast Sign Supply® has supplied quality sign supplies, sign manufacturing equipment, sign software, pinstriping, and custom filled aerosols for the sign making industry. For over 4 decades, we have perfected product lines that meet the business needs of our customers. Since we are a Roland Graphtec and Summa repair center as well as a dealer, we can help you through the startup, production, and maintaining your sign business. We offer a full selection of sign supplies you can count on for quality and dependability. If you can't find what you're looking for in our catalog, please call for assistance for additional items that may not be listed. We will be glad to special order products and stock items you prefer for your everyday needs.

### **PAYMENT**

Pacific Coast Sign Supply® offers an open account to approved businesses. We encourage all of our customers to apply for credit regardless of their method of payment so that we may ship and communicate with you effortlessly. We accept VISA, MasterCard, Discover, check, and money orders.

### **TERMS**

Terms are net thirty (30) from date of invoice, with credit approval. Any balance not paid within the sixty days (60) will be assessed a finance charge of 1.5% per month, which is an annual percent of 18%. Accounts with balances 60 days past due will be placed on C.O.D. until the account is made current. A charge of \$30.00 will be assessed for all checks returned due to insufficient funds.

### **SHIPPING & DELIVERY**

We have free delivery for orders over \$50.00 within the local Portland metropolitan area. Most orders received by 3:00pm PST ship the same day with actual shipping charges (no handling fee) added to the invoice. We try to re-use packaging and shipping materials whenever possible to produce less waste, use less resources, and promote a cleaner environment.

### **RETURNS**

Returns are subject to a 30-day limit with receipt and/or proof of purchase. Restocking fees may apply.

All prices are subject to change without notice. For the most up to date prices, please call.

### CREDIT AGREEMENT

All invoices are due Net 30 days from the date of invoice. As a condition of sale, a monthly service charge of 1.5% will be assessed on all accounts not paid within terms. Pacific Coast Sign Supply® may at its sole discretion and without any advance notice cease the further extension of credit. Applicant agrees to pay reasonable attorney's fees and other costs in the event of default. In support of this credit application, the application, the Applicant authorizes Pacific Coast Sign Supply® to obtain personal and/ or business credit reports. All orders will be shipped C.O.D. unless credit terms have been approved by Pacific Coast Sign Supply™ credit department. Credit terms are revocable. In the event payment terms are not honored, the account will automatically revert to C.O.D. , and/or the Customer will be put on "shipping hold". All sales are F.O.B. Portland, Oregon unless specified otherwise when product is ordered. Pacific Coast Sign Supply® reserves the right to deny cancellations or returns. In the event that Pacific Coast Sign Supply® authorizes return of merchandise, the merchandise must be returned in "as new" condition; including (but not limited to): original packing materials, cartons and documentation, within **30 days** of original invoice. Pacific Coast Sign Supply® has the sole discretion to specify these and other conditions for the return of merchandise. Any supplies returned without return authorization will be returned to customer at their expense. initial \_\_\_\_\_

## SIGNS of the TIMES BOOKS

Commercial Sign Techniques (50) covers the techniques to fabricate the kinds of signs commercial sign shops make every day	\$39.95
Complete Guide to Truck Lettering (41) everything you need to know about vehicle lettering w/paint, vinyl & gold	\$29.95
Gold Leaf Techniques (79) details the art of gilding step by step w/more than 170 illustrations	\$39.95
Graphic Installers Handbook (97) most up-to-date graphics installation guide	\$24.95
Mastering Layout (75) how to see, organize and manipulate graphic elements for legible and visually appealing signs	\$29.95
Neon Techniques and Handling (48) explains all aspects of tube design, manufacture, installation and maintenance	\$39.95
Pinstripping Masters (179) features 28 top pros offering step-by-step instructions, tricks and techniques	\$29.95
Vehicle Wrapping (67) wrapping from start to finish	\$39.95
Vinyl Graphics How to (32) wet and dry application, vinyl auto graphics, temperature extremes on textured or corrugated surfaces (spanish version available (33))	\$14.95
Vinyl Sign Techniques (47) covers every facet of the vinyl sign	\$39.95

**Kafka Video** This is not an instructional video alone, but a demonstration as well. Kafka shows some of the basic capabilities of his scrolling brushes, use of new products, and demonstrates his style of pinstripping with the intention of inspiring the artistic creativity of the viewer. After witnessing this production, you will be overwhelmed by the desire to participate in this art form and with practice reach your desired level of achievement in this discipline. \$39

10584	Creslite Acrylic Lacquer	\$57.60

# CLEANERS

## Vinyl Off

This is a break through product in the Vinyl and Adhesive Removal Field. VINYL-OFF was designed to remove vinyl graphics from fleet trucks, glass, signage, etc. Just wipe it on, wait a few minutes, and peel off the vinyl-and the adhesive- in one step! Take up to 90% less time. You'll save HOURS of labor! And a surprise bonus...it's about as safe as bath soap! VINYL-OFF is also non-flammable and water soluble.

## Adhesive Off

is a ready to use, non-toxic, biodegradable commercial strength adhesive remover. Simply spray onto adhesive, wait approximately 30 seconds and watch the adhesive visibly swell. For best results, agitate with a stiff brush (especially around rivets or other obstacles), then pressure wash (for BIG jobs), scrape, or use a paper towel to wipe off for smaller jobs. Also works on printing inks, bug juice, paint overspray, tar, grease, asphalt, even chewing gum!

## Ghost Off

Non-toxic and biodegradable, simply spray onto a dry oxidized surface, wait approximately one minute and then agitate with a soft truck brush. Follow with a rinse from top to bottom with cool water and watch the white oxidation rinse away! Ghost images disappear before your eyes as oxidation is easily cleaned from weathered surfaces.

## Wrap Wash

Use only 2 oz/gallon of water, lubricates and unlike most acidic products for washing vehicles, Wrap Wash is pH balanced! Does not require wetting the vehicle first, so saves time, money & the environment. Contains specialized components that produce a positive charge, repelling dirt and leaving a clean mirror-like finish.

## Wrap Polish

Restores original luster to time-dulled finishes, removes light scratches, repairs minor clear coat damage, blocks close to 100% of UV Rays. Wrap Polish does not contain wax. It is a high-tech blend of polymers, which gently removes oxidation and pollution.

## Wrap Kit \$22.95

Give both a nice "THANK-YOU" to your customer and educate them on how to take care of their new Wrap! The included brochure gives easy and complete instructions to the new Wrap owner. Includes: micro fiber chenille, micro fiber applicator pad & cloth and trial sizes of both WRAP WASH and WRAP POLISH.

	8oz bottle	quart	gallon
Reflective Vinyl Off	\$9.75	\$22.95	\$69.00

# MAGNETIC PRODUCTS

## WHITE SHEET      24 in. wide .030 inch thickness

PER FOOT	10ft roll	25ft roll	50ft roll
\$3.95	\$35.00 15 lbs.	\$64.00 35 lbs.	\$114.00 62 lbs.

Ready to letter with a lettering enamel or adhesive backed vinyl. Cut to size with scissors or knife. Great for automotive signs or on any ferrous metal. With any automotive application, vehicle should be washed and waxed weekly behind magnetic sheet.

## COLORED SHEET      24 in. wide .030 inch thickness

black, blue, red, yellow, brown, orange & green

PER FOOT	25ft roll
\$4.95	\$93.00

## PRINTABLE SolvMag 40 in. wide .020 inch thickness

SolvMag is extruded instead of being calendared like other magnetic sheet. This process holds the thickness tolerance better, translating to reduced potential for headstrikes, and more even ink coverage for cleaner crisper prints.

PER FOOT	25ft roll
\$6.95	\$165.00

## MAGNETIC TAPE      adhesive backed

WIDTH	1 to 49 ft	50 to 99 ft	100 ft roll
1/2 in	30¢	25¢	\$14.95
3/4 in	35¢	30¢	\$22.85
1 in	45¢	40¢	\$27.50

## MAGNETIC RECEPTIVE PRIMER      allows magnets to stick to any paintable surface.

"Liquid Magnetic Wall" is 100% latex. Two coats are recommended. Allow 24 hours before top coating to achieve desired color. One quart covers 50ft<sup>2</sup> or 25ft<sup>2</sup> with two coats.

Quart of magnetic primer      \$29.95

3 Pack	\$7.95
6 Pack	\$14.30
12 Pack	\$24.30
Empty 4oz bottle	\$1.35

### 4000 Series Reducers, Sealers & Cleaners

**Sealer Dark and White** – Use as initial layer of Auto Air Colors™ over prepared surface. Suitable for use as a replacement of urethane or epoxy sealer except over bare, untreated metal. May be applied direct to urethane, enamel, lacquer and other finishes after scuffing with 800 grit wet/dry paper or coarser grade of abrasive. Tinting 4001 Sealer with top-coat color improves coverage of top-coat color.

**Transparent Base** – Use as base for mixing with 4600 Series Candy Colors and as mid-coat.

**4011 Flash Reducer** – Improves performance of all Auto Air Colors. Contains solvents which improve flow, reduce tip-dry and assist curing to a level, smooth film. Most often used 10% per volume with spray guns, more with airbrush. Reduce 4600 Series Candy-Pigments 3:1 Flash Reducer. 4010 Flash Reducer is a specialty reducer with less solvent for less flow and leveling enhancement.

**Cleaner** - Highly concentrated biodegradable cleaner used to clean airbrushes or spray guns. **Restorer**- Removes Auto Air Colors™ or dissolves cured and uncured water-based paints. Makes for easy clean-up and complete removal of Auto Air Colors for cured finishes (prior to clear) and dried paint in spray guns and airbrushes.

**4100 Series Aluminum Bases**- Highly reflective bases for 4600 Series Candy-Pigment colors. Do not use Aluminum Bases direct to substrate. Always apply Aluminum Bases over 4002 Sealer Dark or other Auto Air coat for optimum adhesion.

### 4200 Series Graphic Colors

**Semi-Opaque Colors** – Standard base coat colors.

**Fluorescent Colors** – Limited lightfast when exposed to sunlight.

**Transparent Colors** – Use for fine-detailed airbrushing, blending and as a toner by mixing with other series colors.

### 4300 Series Special FX™ Colors

**Pearlized, Metallic and Iridescent Colors** - Colors are opaque and cover well. May be used as a base for 4600 Series Candy Colors

### 4400 Series Color-Shift FX™

**Gem Color-Shift™** – Holographic, color-shifting pearl flakes in a transparent base. Use over black or other color base for color-keying effects. Best if 4004 Transparent Base applied as mid-coat over Gem's large pigment size for a more-even paint film prior to clearing.

**Flair Color-Shift™** – Multiple color shifting colors.

**Hi Lite Interference** - Subtle color changing pearl in a transparent base. Use over black or other colors for color-keying effects. Travels from respective color to transparent. Great for ghostlike effects.

### 4500 Series Sparkle™ Colors

**Hot Rod Sparkle™** – Large pearl flakes in a transparent base. Use over black or other colors for color-keying effects. Mix direct with 4200 Series Transparent Colors for candied-pearl bases. Mix direct with 4600 Series Candy Colors for pearlescent candy colors. Best if 4004 Transparent Base applied as mid-coat over Hot Rod Sparkle's™ large pigment size for a more-even paint film prior to clearing.

**Sparkle Flake™** – A metal flake in a transparent base. Use over black or other colors for color-keying effects. Mix direct with 4600 Series Candy Colors for pearlescent candy colors. Best if 4004 Trans. Base applied as mid-coat over flake's large pigment size for a more-even paint film prior to clearing.

**Cosmic Sparkle™** - Small pearl flakes in a transparent base. Similar to Hot Rod Sparkle™.

**Sparklescent™** - Unique blends of multiple effects colors that create a single stage "candied" custom finish color. Apply over white base or color key with a 4300 Series Metallic Colors base. For extra effects, use Sparklescent™ Colors as base for 4400 Series Gem Color-Shift Colors and 4500 Series Hot Rod Sparkle™ and Cosmic Sparkle™ Colors.

### 4600 Series Candy - Pigment Colors

Pigment-based candy colors. Concentrated - reduce 3:1 4011 Flash Reducer when using as mid-coat over aluminum or metallic base. Colors cure to a matte finish; candied effect visible after clear applied.

House of Kolor Striping & Lettering enamels are specially designed for striping, lettering, and airbrush artwork. They feature high pigmentation, low solids for a minimal edge, and long open time. Apply over existing finishes or topcoat for a smooth, durable finish.

Striping catalyst adds gloss and durability when clear coatings are not used. Mix only amount of paint that will be used within 3 hours. 8 parts House of Kolor urethane striping enamel to 1 part catalyst.

Japan Colors are finely ground, lead free, flat, quick drying, paste colors. This traditional product has a wide range of graphic and professional artist uses. They are used by sign painters as a fine lettering paint when a flat finish is desired. Also used for a variety of decorative applications such as lettering, striping, faux finishes stenciling or for making glazes and stains for antiquing or graining. Used extensively by specialty painters and scenic artists for aging and glazing. They are ideal toners for flat paints and may be added to oil based gloss paints to create a semi-gloss finish. Dry Time: @70 F; 50% Relative Humidity. Dries to touch - 1 hour; to handle: 2 hours; to recoat -8hours, full cure - 24 hours. May take longer to dry under humid conditions.

## White Bristle Fitch

White Bristle Fitches are lettering brushes best suited for outdoor work such as walls, bulletins and rough surfaces.

size	4055 Mack White Bristle (long)	4090 Mack White Angular
1/4"	\$4.00	\$2.40
1/2"	\$6.50	\$3.50
3/4"	\$9.20	\$4.70
1"	\$10.90	\$7.00

## Soft Fitch

Soft Fitches are used in lettering paints for layout, outlining, pictorial & tight work.

size	4039 Mack Soft Angular
1/4"	\$5.95
1/2"	\$9.50
3/4"	\$23.75
1"	\$28.95

## Flat Truck Brushes

Flat truck brushes are normally used for larger lettering and production lettering. They can also be used as a fill-in brush and an outliner for large letters. The long hair length allows the brushes to carry a lot of paint. Flat truck brushes are suitable for most surfaces.

width	162 Mack Golden Taklon like sable, for water	2962 Mack Taklon & Squirrel for oil or water
1/4"	\$3.85	\$4.95
3/8"		\$6.25

Bulletin Cutters are used for filling in large letters & graphics.

size	2191 White Bristle Cutter
1"	\$7.95
1 1/2"	\$11.80
2"	\$14.65

## Wipe-out Tool

Wipe-out tool can pull or push the paint away on smooth surfaces to make a perfect edge or corner.

\$6.95

## Lettering Quills

The brown quill is best suited for smooth surfaces such as glass or automotive surfaces. Brown Quills are slightly softer than the grey quill. The grey hair has more snap than the brown. It is used for general commercial work such as signs, truck lettering, boats, etc. The grey hair is more durable than the brown, and this brush is suitable for lettering on most surfaces.

size	189L Grey Mack Quill	3012 Grey French Mastr	2000 Grey Scharff	Kafka Kwills	3173 Brown French Mastr	Hannukaine Mack Quill

1	\$7.20		\$6.50 (J-1)
2	\$7.40		\$7.00 (J-2)

The series #444, perfect for scrolling and script, is a specially blended golden taklon. It is a liner style with long quill like handle and metal ferrule.

The brush pinstriper Alan Johnson uses to sign his work. A must for stick men. Made with a special taklon with extra long length. It is a liner style with long quill like handle and metal ferrule.

The Jenson's Swirly Q brush is designed for scroll striping and script lettering with enamel based paints. It is a liner style with long quill like handle and metal ferrule.

3						\$15.88
4						\$17.45

Series 20 squirrel hair striper are lacquer and enamel resistant, excellent for auto body touch-up and pinstriping. Tied with green thread.

Formally Cosmos, this sword brush is made of pure Kazan squirrel hair with the traditional extra short handle.

Squirrel hair with brass ferrule and short round maple handle. This is a remake of the original popular Grumbacher Mock One sword.

Series 10 100% unmixed blue squirrel hair striper is hand crafted and shaped as it was many years ago. Tied with blue thread.

The new striper with less belly. The shape is similar to the "old Dominican," which was discontinued several years ago. Made with Kazan squirrel hair and bound with a brass ferrule.

Pure squirrel hair in lacquer resistant setting with brass wound ferrule. German craftsmanship.

2						
3					\$12.75	

The unique design of the combination synthetic and natural fibers enhance the flow of palleted paints with great control and length of line.

What makes this sword brush special is its short hair length allowing greater control for intricate designs as well as long lines. Each brush packed in its own tube.

A re-creation of Big Daddy Roth's "White Elephant" brush using the original stock of handles. Still made by Andrew Mack's skilled craftsmen for over 100 years.

This 4 purpose brush has fine blue squirrel & black synthetic hair for scrolling, short stripes, small signatures and script lettering. Hold brush 65°-85° to surface using ¼" to ½" of the tip.

Most similar to a very long liner. Allows tight radius curves without brush rotation and flareout. Best used at angles between 50 and 80 degrees to work surface.

This gold ferrule & capsule striper is made for traveling out of 100% blue squirrel and easily tucked into a pocket for striper on the go. 1" hair length with extremely small belly.

# The Beugler Pinstriping Tool

The Beugler Striper makes pinstriping and detailed paint lining on any surface remarkably simple, and it's easy to use. The Beugler tool is not gravity fed which enables paint to flow in any position, is safe and non-pressurized, does not require tape for clean edges, and eliminates stick-on vinyl tape and paint brushes. Stripe from fine 1/64" to broad 1/2".

**Deluxe Kit**  
Deluxe comes with your choice of three of the seven standard single stripe heads, paint barrel, guides, cleanup brush and instructional user guide. \$109

# PRO VEHICLE OUTLINES

Digital Designware now has **44911** templates available to vehicle graphics experts worldwide! With the to-scale vehicle templates 1:20 - scale it takes just a few seconds to design professional vehicle lettering and fulfill the special requests of your customers. The templates contain all important details, like door handles, fuel cabs, rails and much more details. There is no need anymore to measure the vehicles yourself, it's already done. Additionally with the 3D version, conventional designs are converted into high-end 3D presentation videos that can be emailed to your customer.

## Features:

- 45,000 vehicle templates
- AI file format (Illustrator)
- Scalable vector format
- 1 year online updates for vehicle templates included
- 5 accurate views incl. top views
- Perfect for vehicle lettering and wraps
- Cars, SUVs, Pickups, Vans, Buses
- Big Rigs and Trailer
- Aircrafts

Car 'n Truck Pro Vehicle Outlines Basic \$295

## Print'n Wrap Graphics

**Full Wrap Graphics \$195**  
This is a professional collection of high resolution, large format backgrounds for your vehicle.

**Full Wrap Graphic 2 \$195**  
This is a professional collection of high resolution, large format backgrounds for your vehicle wraps.

**Full Wrap Graphic 3 \$175**  
This is a professional collection of high resolution, large format backgrounds for your vehicle wraps.

**Ghost Flames \$59**  
525 high resolution images, ready for print and cut.

**Skylines \$79**  
Full Wrap Graphics is a ultimate collection of print ready backgrounds for your vehicle wraps.

**Tiltable Textures \$175**  
This collection comes with hundreds of high resolution and seamless tiles for your individual designs.

**Wild Fire \$175**  
525 high resolution vehicle graphics, ready for print and cut.

**Hot Flames Vol. 2 \$49**  
225 flame graphics for cars, trucks, boats, jetskis... 100% vinyl-ready!

## PhotoZoom Pro 2

PhotoZoom Pro™ 2 is based on S-Spline XL technology introducing a revolutionary breakthrough in digital image enlargement. It is able to render sharp and crisp clear image magnifications, perfectly focused, yet without the jagged edges, loss of detail or lack of photorealism that normally come with enlarging images. The software is perfectly suited for digital photography, large format printing and web design, but also for industrial image processing such as space technology, security and forensic applications. Demo version available. **\$189**

- New S-Spline XL interpolation algorithm!
- Improved, powerful yet very easy to use interface
- Advanced fine-tuning tools for even better enlargement results
- Batch conversion
- Extensive support for high-end image formats (such as 48 & 64 bit images)
- Works as standalone application as well as Adobe Photoshop compatible plugin

# SIGNSHOP HELPER

Two disk set \$199

This is the perfect package for designing new storefront signs, their vehicles and even the company letterhead. All graphics, logos, and templates are designs in EPS format. **Signshop Helper Combo** has more than 500 signatures and vehicle graphics designed for pro-racing graphics, commercial vehicles or cool street art. It also contains 550 sign elements and over 450 © Color Vehicle Templates. Also on CD, SignFills Helper with over 200 custom fills for printing, installation and PDF preview manual. **Signshop Helper Combo** will help all sign and automotive shops. The logo elements are great for making signs for all types of new businesses. For example: 25th anniversary, slogans, daycare, automotive store, art gallery, pet shop, contractor, music shop, restaurant, transportation company and travel agency. Choose the template, delete the sample text and insert the new text. Easy as 1,2,3, you have created a new business image or logo!

## PYRO MEDIA

**Need to Add Some Heat to Your Designs? Try the Flame Master Collection!**

Unlike some of the other various flame packages on the market that use drawings to depict fire, the Flame Master Collection uses actual photographs to capture the amazing details of real fire. All of the 60 high resolution images in the Flame Master collections are professionally photographed, edited and are incredibly user friendly. Utilize the Flame Master Collection to add some heat to your business cards, signs, banners, vehicle wraps, laptop skins, fills and much more.

The Flame Master Collection is available for \$34.95

# 8 color VersaCamm® VS-640

The VS series now combines the best features of all of its predecessors to provide faster production printing, higher image quality, the Pro XJ HD feed motor, and three ink configurations including the option to run award winning Eco-Sol MAX for greater productivity than ever before. The VersaCamm VS-640 introduces the first ever 64" print & cut, a brand new 8 channel piezo print head technology combined with industry-first Eco-Sol MAX Metallic Silver ink in an entry level priced package. The new mirrored ink configuration in dual CMYK mode eliminates chromatic banding making possible maximum speeds of 248 ft<sup>2</sup>/hr.

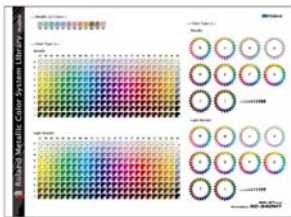

## Improved Dot Control

With seven different dot sizes available, the VS-640 can achieve smoother gradations and richer density for photographic and high resolution vector output. By using a finer dot, the VS-640 can achieve rich, bold color and deep image saturation on more media than ever.

## 512 Metallic Colors

## Vertical Cartridges

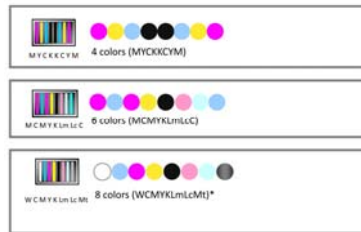

New vertical configuration provides the convenience of access from front or back and allows the use of 440ml cartridges without requiring more space.

## New VersaWorks™ 4 RIP Software

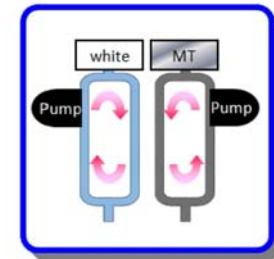

The VersaCamm VS-640 takes full advantage of the latest Roland VersaWorks™ 4.0 RIP software. This true Adobe PostScript 3 RIP is designed by Roland to ensure exceptional production output with unmatched ease of use. VersaWorks™ incorporates the latest Adobe CPSI engine for faster RIP processing, better color and smoother gradations and can control up to four Roland devices including GX series cutters. With Roland@NET, updates are free and easy, automatically uploaded through your internet connection.

## Flexibility of Three Ink Modes

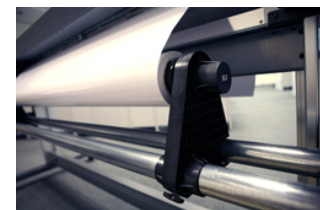

## New Wiper System

Combination of regular wiper and newly added side wiper help keep the print head clean and operating normally. The additional side wiper reduces user error and the need for manual cleanings. This wiper configuration is designed to decrease wear and tear on the print head and prolong its life by reducing buildup around the edges of the print head.

## White & Silver Ink

The VS-640 goes beyond just CMYK by adding Met. Silver & White ink, in addition to Light Mag. & Light Cyan, for printing on a range of substrates including clear vinyl and films. The flexibility of multiple print modes ensures maximum visual impact and strong metallic colors across different media types and applications. The new re-circulation system cycles these heavy pigmented inks to ensure that settling doesn't occur in the lines and saves on ink because the ink lines don't need to be purged.

## Advanced Media Handling

Features heavy duty media shafts and flanges that stabilize printer performance and support media rolls up to 88 lbs.

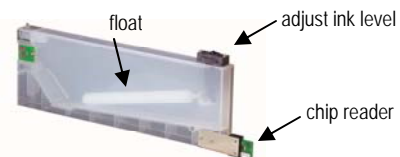

Bordeaux's EcoSolvent ink protects the work environment. Bordeaux replaced toxic chemicals with the safest possible organic solvents to ensure print operators' safety and protect the environment. The specially formulated non-corrosive materials increase printheads lifespan and offer adhesion to uncoated media comparable with real-solvent inks. Bordeaux's EcoSolvent ink can print on any substrate. Bordeaux inks provide 100% match to the original OEM color gamut allowing the use of abundant OEM ink profiles.

220ml cart. ECO220	\$45
440ml cart. ECO440	\$75
1 liter bulk ECObulk	\$99
refillable cartridges	\$39
1 liter Flush	\$65

Direct replacement for Roland & Mutoh EcoSolvent Inks

**WARNING!**  
 Roland may deny a claim during the standard warranty period if the component failed as a result of the use of 3rd party ink, including excess ink coating circuit boards. Second year and extended coverage is contingent on the use of Roland inks.  
 Please call us concerning any issues!

**Bulk Ink Systems** The features and details of this bulk system is far superior to anything available. Each cartridge contains a float activated valve that very accurately controls the exact ink level to avoid print head ink starvation or overrun. This eliminates the problem of having too much or too little ink in the reservoirs like all the other bulk systems offered. Setting of ink levels can be adjusted from outside the cartridge. Each cartridge has an easily accessed chip reader for those printers that require them. Shut off valves on each ink line and cartridge drain plugs facilitate periodic cleaning. 1.5 liter reservoirs can be placed with no regard to level above the cartridges. Compatible with Roland, Mimaki and Mutoh printers.

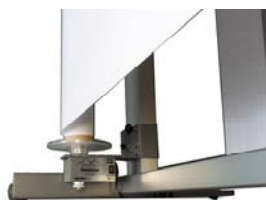

4 color includes 4 reservoirs and 4 cartridges	\$475
4 color includes 4 reservoirs and 6 cartridges	\$695
6 color includes 6 reservoirs and 12 cartridges	\$995

## A Take-up Everyone Can Afford!

typically OEM take-up systems are priced over \$2000

- Avoids ink face to face contact of media
- Use with any Roland & Mimaki Printer
- Face-in or face-out winding
- Use any 2" or 3" core
- No need for tools
- Install in under five minutes
- Fully CE Certified

Installs easily on all Roland **SP & VP** VersaCamm, **RS** VersaArt, **SC & SJ** SolJet, Hi-Fi Jet, Mimaki Jv2, Jv3 and Jv4 printers. As with all take-up devices contour cutting is not compatible. **Additional \$99 mounting bar allows use with any printer or laminator!**

# ROLLSROLLER®

## FLATBED APPLICATOR

- Economical flatbed printer substitute combined w/roll printer
- Eliminates application errors, waste & reprints
- One person can apply 900ft² per hour
- Apply 4'x 8' graphic in under 2min. - one person
- Illuminated work/cut surface
- Applies film without tension and stretching
- No need for application fluid or air release media
- No need for transfer tape for non-contour cut media
- Precision built in Sweden

All companies that work with self-adhesive films can benefit from using a RollSroller®. Almost 1,500 companies worldwide have already discovered this, and have made RollSroller® part of their business concept. The RollSroller® creates its own capital and pays for itself by doing the job in a third of a time with only one person. With RollSroller® one operator can apply 900 square feet an hour. This often means that it is the printer that can't keep up. This means that one applicator can serve more than one printer. The RollSroller® 34/145 is our most popular model. If you spread the investment for this applicator over 60 months, the cost is \$20 per working day. If an operator costs \$20 per hour, the RollSroller® pays for itself if it's used just over one hour per working day. At [www.rollroller.se](http://www.rollroller.se), you'll find a calculator that works out exactly how much you save by investing in a RollSroller®. **More than time savings.** But it's not just time savings that make RollSroller® your most profitable working partner. The RollSroller® is used for all types self-adhesive film applications, including banners, signs, lamination, glass application, color sheeting of large areas and application on substrates up to six centimeters thick. Its uses are almost infinite. **Better results.** The RollSroller® minimizes waste and produces perfectly flat application without bubbles and creases – something that's stated in testimonials by sign makers who use the RollSroller®. **Improved operator ergonomics.** Manual application on really big signs involves a lot of climbing and knee-bending. The RollSroller® gives you an ergonomic working position that spares your back and knees. And if you choose a height-adjustable applicator, the benefits are even greater. The RollSroller® is extremely user-friendly. The machine is fully assembled at the factory, and makes profits right from day one. At [www.rollroller.se](http://www.rollroller.se), you can read comments from some customers who have already invested in a RollSroller®.

We here at Pacific Coast Sign Supply® have been looking for the perfect UV flatbed printer to represent for over 5 years. We cannot find one that our customers can afford to own and maintain. Our conclusion is that except for some of the largest wholesale print houses, a flatbed printer does not make any financial sense. It is a very specialized printer with many warts. RollSroller® is the solution!

### RollSroller + Roland XC-540 vs UV Flatbed Printer

- \$53,490 vs \$80,000 bare bones & typically \$95,000 to \$120,000
- 3yr EcoSolvent vs 2yr UV ink
- 15min print & mount 4'x 8' vs 17min print on 4'x 8'substrate
- No special ventilation vs ventilation required
- \$2295/yr warranty vs \$10,000/yr service agreement
- No bulbs vs 2 bulbs @ \$750ea every 500 to 700 hours

## SummaCut R Series Cutters

The SummaCut series is one of the top selling cutters in the world thanks to an unparalleled combination of performance and value. Added to its' host of Pro-level features is a 2MB buffer and a USB port connection for plotting directly from Mac and new generation PC computers. NEW OptiCut: A unique overcut feature that compensates for changes in blade offset that result from blade-wear. Guaranteed repeatability: SummaCut plotters have the same patented drive drum system found in our Pro cutters, so you can cut individual plot files up to 26 feet long with guaranteed pin-point accuracy. New X-sensor, which scans the full light spectrum to enable OPOS X to precisely locate registration marks, including images with thick over-laminates. Easy media loading: Integrated media rollers and unique roll-end flanges make straight media loading fast and easy. Combined with the super-accurate tracking, you'll never babysit another plot, even at top speed. Volume production throughput: At up to 44 inches per second, SummaCut cranks out vinyl faster than most manufacturers' best machines. TurboCut is a new feature that increases throughput by as much as 40% or more! Incredible ease-of-use: Adjust speed and pressure with the on-plotter control panel, or change settings right from your computer with Cutter Control 4.0 software. Win Cut 3.0 output software now included, accepting eps files and acts as a plug in for Corel-Draw 10 through 13.

## Summa S Class Pro D / Pro T Series Cutters

Summa S Class cutters are the most advanced vinyl cutter Summa has ever offered, features include touch-screen controls, OPOS X (Optical Positioning with X Sensor), dual protection strips for cut and pounce, variable pressure pinch rollers, auto sheet-off ability and an enhanced media feed system. Summa S Class cutters are available in three widths (75, 120 and 160 cm) and one of two configurations: D Series, which employs a drag-knife cutting head, and; T Series, which employs a tangential (motor-controlled blade rotation) cutting head. All six cutter models include all of the following:

**SelectTouch™ Control Center:** The new touch-sensitive control panel puts every advanced feature at the user's fingertips by way of a clear, crisp high contrast back-lit display.

**Variable-Tension Pinch Rollers:** Selectable pinch-roller pressure delivers superior tracking over a wide range of vinyl, screen-lithe, polyester and paper. Whether cutting thick or thin material, users get exceptional tracking.

**Dual Cutting Strips:** Separate cut and pounce protection strips let users switch from cut and pounce mode without changing their protection strip. So going from cut to pounce is as easy as swapping a blade for a pen, making Summa S Class cutters as easy as they are versatile.

**OPOS™ X Print-Cut Alignment:** The world's best and best-selling optical alignment system has been improved with the introduction of OPOS X. It features a new X-sensor optical scanner capable of reading registration marks on a wider range of output.

**Auto Cut-Off Knife:** The totally redesigned cutting head incorporates a new auto sheet-off knife, which users can optionally set to slice their media at the end of each job.

**Offset Media Supply Rollers:** The new media support rollers are now offset to hold roll-fed materials more securely. Now users can cut at top speeds without fear of their roll being pulled off its track.

**Legendary Summa Tracking System:** Summa's exclusive MicroSprocket™ drive drum delivers tracking accuracy that's become the industry standard for long distance tracking.

# Sign Stakes

## "H style stepstake"

30" long, 9 gauge galvanized steel inserts into coreplast sign. Holds sign 15" off ground.

**6" or 10" wide**

99¢ each

85¢ @ 25

75¢ @ 50

65¢ @ 1000

55¢ @ 5000

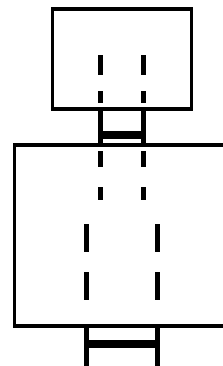

## "Piggy-back stepstake"

6" by 8" for stacking coreplast signs. Developed for adding a "rider" on top of real estate signs. This stake can also be used to splice signs together for a sign display.

65¢ each

55¢ @ 50

## "Mini 2-wire stepstake"

2" by 16", 9 gauge galvanized steel inserts into coreplast sign. This stake is perfect for small low-set yard signs, such as security system and lawn service signs. Holds sign 8" off ground.

60¢ each

55¢ @ 50

## "Single shaft stepstake"

10" by 38", 9 gauge galvanized steel inserts into coreplast sign with 1/2" round rod main shaft. Holds sign 24" off ground.

\$2.75 each

\$2.25 @ 25

## "T back"

4ft black enamel angle iron stake with 13 slots, galvanized foot step, and galvanized crossarm for easy sign mounting. Stands 3ft above ground.

\$4.50

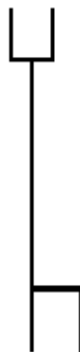

## "Pitch Fork"

1/8" steel inserts into coreplast sign with 5/16" round rod main shaft all black enamel.

30" \$3.25 each

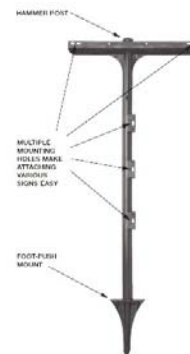

48" \$3.50 each

## "T Cade"

42" black polyethylene stake with multiple mount holes, foot step, and hammer point for easy installation. Stands 3ft above ground.

\$5.95

- 100% Made in the USA
- Eco-friendly recycled plastic products
- Lighter weight for reduced shipping costs
- Strong, durable great looking products

### Spider Stake II

A practical replacement has arrived for the flimsy "H" wire. The rugged webbed design not only stands up to the wind, but will penetrate hard ground much easier than a thin H-wire. The handy integrated step-peg makes it easy to get the stake into even hard soil. The upper torsion bar design evenly distributes wind loads and the dual spring arms faithfully bring the sign back to attention. Use with corrugated plastic substrates. The light weight stakes are pre-packed in quantities of 50 and ready to ship. The compact 13" x 13" x 24" box weighs only 11lbs. packed, and ships at actual weight.

99¢ each  
 85¢ @ 25  
 75¢ @ 50  
 65¢ @ 1000

### Window Clip

The USA Window Clip is designed for easily sliding onto most any car or truck window. Car dealer's love the high-impact tool because they're inexpensive - especially when compared to a magnetic corrugated plastic roof- tent. Whether parked in the street or in a driveway, real estate agents use them on their car to draw attention to the open house they're hosting. USA Dealer Clips are lightweight and durable, and made to be used over and over again. To assemble, simply insert the prongs into the core of a corrugated plastic substrate.

\$3.45 each  
 \$2.95 @ 30  
 \$2.65 @ 120

### Step Frame

This realtor style Step Frame accepts either metal or corrugated plastic 18" x 24" substrates that simply slip into place. At slightly over 2lbs., their light weight makes for effortless portability. When the need arises, additional screw bosses have been molded in for adding top and bottom riders. The integral foot stirrup makes for an easy installation. A 5-count box of frames weighs a mere 13lbs. The 25-count package weighs in at less than 53lbs., including the carton. In fact, you could even cut open a 25-count box and slide a corrugated plastic sign face into each frame, reseal the package, and they're ready to ship to your customer and still weighing under the UPS 70lb weight limit.

\$9.95 each  
 \$9.75 @ 5  
 \$8.95 @ 25

### A1A-Frame

A1A-Frame is a truly economical A-frame option for displaying the standard 18" x 24" or 24" x 24" sign. The wide 6mm channels and simple bungee-cord elastic strap provides for an exceptionally easy setup. The lower cross-member at the base allows the use of any conveniently available ballast weight.

\$8.95 pair  
 \$8.25 @ 12  
 \$7.95 @ 40

### Hot-dog Stand

Hot-dog Stand is designed for indoor table- and counter-top use. This item is an extremely low-cost, compact design that supports the much smaller versions of corrugated plastic. Perfect for displaying counter top courtesy signage, such as: "This Window Closed", or, "Brake Inspection Special".

99¢ each  
 85¢ @ 50

### A-Frame

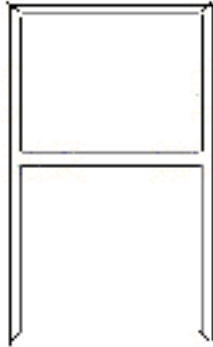

Specifically designed to accept a wide range of substrates, the USA A-Frame is the most versatile A-frame. The deep dual channel end-cap design will accept 4 mm and 6 mm corrugated plastic, dry-erase board, PVC, and even composite aluminum. The unique bungee-style center support and versatile design makes this unit extremely flexible and capable of capturing a wide range of sign-face sizes all the way from 18" x 24" to 36" x 60" and beyond. Adaptable end-cap design completely eliminates the need for fasteners. The lower cross-member at the base allows the use of any conveniently available ballast weight.

HG 425SP-30/M	30" x 10 yards— HG Adhesive, Perforated & Mylar Back	\$226.60	\$192.55

### Applications for Regular Grip

1. Always test on a sample piece prior to starting the big job.
2. Use on primed and/or painted wood or wood alternatives, primed foam, plexiglass, glass, Avonite and Corian.

### Applications for High Grip (HG)

1. High grip adhesive is very aggressive. Use on rough or porous surfaces only! Not for use on glass or painted surfaces.
2. Used as a resist material when blasting concrete or brick when the surface area is rough.
3. Always test on a sample piece prior to starting the big job.
4. No filler adhesive is needed.

reg R tape  
apliTAPETM tears  
cleanly with improved  
wet performance.  
Same as transferite  
6592.

clear AT60  
Clear ChoiceTM is priced at  
paper tape prices, no  
stretch qualities, excep-  
tionally clear, easily pulls  
apart with no adhesive  
delamination if adhesive  
touches adhesive. Great  
for Speed Press®.

clear AT75  
An EZ-Tear, air egress  
film with lay flat qualities.  
AT75 does not yellow and  
works in wet applications.  
Rigid face stock prevents  
stretching that causes  
misalignment. Clarity aids  
registration and multi-color  
overlays.

premium R tape  
Conform series w/RLA lays  
flat, stays flat and stores  
longer. (4775) same paper  
weight & tack as 3M SCPS-  
2, but without the 3M cost!  
Superior to transferite 6792.  
4700 is *Low tack for large  
digital graphics.*

# Cad Cut Heat Transfer

EasyWeed is a polyurethane, ready-to-cut material, in a league of its own because of its pressure sensitive carrier, allowing you to weed small letters, offers excellent durability, even after repeated washings. Perfect for single color or multi-layered applications. This is a **HOT PEEL** product.

### Use On:

- 100% polyester
- 100% cotton
- All poly/cotton blends

### Application:

- All designs must be cut in reverse
- Preheat garment in heat press at 302F degrees for 4 seconds
- Position EasyWeed application on garment
- Heat apply at 302F degrees for 10-15 seconds, medium pressure
- *Peel Hot*

### Standard Colors:

White, Black, Royal, Navy, Red, Yellow, Green, Orange, Fuchsia, Light Blue, Brown, Eggplant, Teal, Grey, Gold, Silver, Bordeaux, Grey, Cream, Violet, Lemon, Sun Yellow, Dark Green, Pale Blue, Lilac, Hibiscus, Green Apple, Lt Pink, Turquoise

### Fluorescent Colors:

Yellow, Orange, Green, Raspberry, Blue, Fuchsia

<b>Reflect-All</b> 20"x 5yd roll	<b>\$107</b>
----------------------------------	--------------

The state of the art in polyurethane **reflective**, ready-to-cut materials. Reflect-ALL is a truly remarkable product that has a higher reflective ability due to its patented glass bead construction. Reflect-ALL cuts and weeds easily and can be applied to most textile surfaces.

### Use On:

- 100% Polyester
- 100% cotton
- All poly/cotton blends
- Lycra®
- Most nylons
- Spandex®
- Leather

<b>Teflon Sheets 18"x 20"</b> <b>\$13 each</b>

# Digital Print Heat Transfer

## Designed for use with:

All eco-solvent and solvent printers/cutters

- Roland Eco-Sol MAX
- Mimaki JV-3
- Mutoh

All resin printers

- Roland PC 60 or 600
- Gerber Edge

## Use On:

- 100% polyester
- 100% cotton
- All poly/cotton blends

Our top selling digital product that is easy to print, cut, and heat apply. ColorPrint™ II is a thin film that is a great alternative to silkscreening and embroidery.

## Application:

- Print and cut design using your choice of software and printer
- Wait at least 4 to 6 hours for ink to cure and dry before weeding or masking
- Mask image using ColorPrint™ Mask to remove the image from backing if necessary for registration
- Preheat garment at temperature of 320F degrees for 4 seconds
- Position logo on garment
- Heat apply at 320F degrees for 10-15 seconds, medium pressure
- Peel mask warm or cold

ColorPrint Evolution™ is a high opacity digital media with a matte finish, incredibly soft hand, and amazing stretch! No dry time is required; however, the ink is not cured until it is heat applied. This revolutionary digital media is on a pressure sensitive carrier, so once it is masked, we recommend placing it back on the paper carrier.

## Application:

- Print and cut design using your choice of software and printer
- No wait for ink to cure and dry before weeding or masking
- Mask image using Evolution™ Mask to transfer the image from backing
- Preheat garment at temperature of 320F degrees for 4 seconds
- Position logo on garment
- Heat apply at 320F degrees for 15 seconds, firm pressure
- Peel mask hot
- Do not stretch right after heat application

## Use On:

- Lycra®/spandex
- 100% polyester
- 100% cotton
- All poly/cotton blends

Siser	15"x 5yd	20"x 5yd	29"x 5yd	29"x 10yd	29"x 50yd

Colorprint II	\$32		\$62	\$119	\$479
Crystal	\$44		\$85	\$159	
Extra	\$46				
Metallic		\$117			
Evo Mask			\$19		
ColorMask	\$9				\$149

A clear film designed to yield full color logos for application on light color or white garments. You get full color capability with a softer look. NO MASK REQUIRED! Images are printed in reverse or mirror format. Available in MATTE or GLOSS finish.

## Application:

- Peel pink liner to expose ink receptive surface
- Print and cut design in reverse
- Wait at 4 to 6 hours for ink to cure and dry before weeding
- Preheat garment at temperature of 320F degrees for 4 sec.
- Position logo on garment
- Heat apply at 320F degrees for 10-15 seconds, medium pressure
- Peel cold

## Use On:

- Nylon
- Leather
- 100% polyester
- All poly/cotton blends

Full color digital printing that is great for difficult fabrics such as leather, nylon, bags and umbrellas.

## Application:

- Print and cut design using your choice of software and printer
- Wait 4 to 6 hours for ink to cure and dry before weeding or masking
- Mask image using ColorPrint™ Mask to remove the image from backing if necessary for registration
- Preheat garment at temperature of 320F degrees for 2-3 sec.
- Position logo on garment
- Heat apply at 320F degrees light pressure for 12 to 14 seconds, peel hot

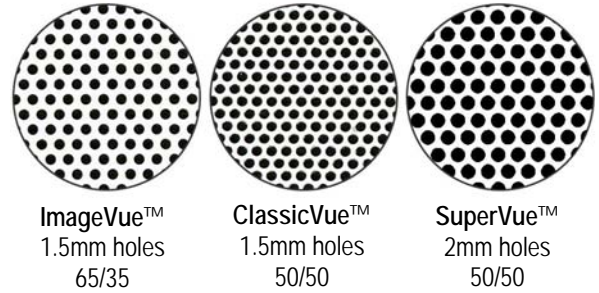

# ONE-WAY VISION FILM

## Clear Focus

- 8mil PVC film allows stunning graphics on one side and a clear unobstructed view through glass on the other.
- Allows premium ad placement: can be placed on glass doors at eye level; on buses to create "moving billboards".
- Reduces heat and glare from the sun.
- Enhances privacy and security.
- Easy to print on and install. 2 to 3 year life on vertical surface.
- Creates new, innovative media space without obstructing views.
- Pressure-sensitive adhesive with solid release liner.

**Which Vue?** With their 65/35 perforation pattern and 1.5-mm holes, **ImageVue** is recommended for small-format window graphics with detailed images that will be viewed from a close distance. When including text in the design, use a font size of 30 point or larger for **ImageVue** and a font size of 50 point or larger for **ClassicVue**. Use **SuperVue** for building wraps and other supersized graphics. Brightly colored inks (e.g., reds, yellows, oranges, and bright greens and blues) provide the best results. Avoid using dark colors (dark purple, navy, brown, black) for background colors. This is because with bright colors the eye tends to focus on the graphics, whereas dark colors allow the eye to see through the graphics.

**EconoVue™** 6mil PVC film with 60/40 perforation pattern and 1.6-mm holes rated for one year outdoor life

width	100ft
54in	\$335

**Installation Guidelines:** Prior to installation of printed graphics, we recommend attaching a small piece of CLEAR FOCUS film to glass as a test to help you become accustomed to the film's characteristics, including adhesion strength. Glass surface must be clean. Use mild soap and water to clean the glass. Do not use glass cleaners with solvents (e.g., Windex®). Surface must be completely dry. Use lint-free cloth or industrial paper towels to dry glass. Temperature of glass must be moderate between approx. 40° F (5° C) and 90° F (32° C). In cold weather, apply film in late afternoon, after windows have warmed up, or, in the case of a vehicle, in a garage or other enclosed area (with the vehicle engine turned off). Applying film to glass that is too cold may adversely affect adhesion of film. In hot weather, apply film in the early morning, while glass is still cool. Applying film to glass that is too hot can cause the film to stretch during installation. Clear with liquid laminate, Oracal 290GF or 297GF optically clear cast PVC laminate after printing. Oracal optically clear laminate keeps holes free of rain to retain see through properties.

## China Perf

Economy white solvent & eco-solvent printable PVC window film with 1.6mm holes and 2.4mm spacing. Permanent solvent adhesive with black backing. Will not conform to complex curves. Rated one year outdoor life in vertical applications. Laminate with liquid laminate or Oracal 290GF or 297GF optically clear cast PVC laminate after printing.

# Laminating Equipment

## Columbia Cold Laminator

Columbia series laminators are capable of mounting, laminating and encapsulating up to 62" (1600mm) width prints and applying transfer tape. Single control wheel enables adjustment of substrate thicknesses. Auto-grip shafts aid easy loading and positioning of materials. Equipped with automatic liner stripping and graphic pickup reels with adjustable clutches, bi-directional electric & manual feed, stepless speed regulation up to 3"/sec., foot switch and three emergency stop switches mounted front and back for operator safety. Laminator will process most popular substrates up to a thickness of 20mm or 0.75in. Shipping weight is 850 pounds.

**Columbia 63 63" width \$5195**

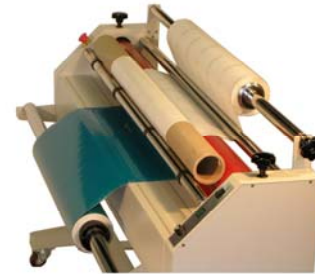

## Willamette Cold Laminator

Willamette series laminators are equipped with electric & manual feed, laminate supply reel with variable resistance (shown below), passive laminate backing take-up reel (shown below), stand, bi-directional stepless speed regulation up to 3"/sec., 130mm (5.1") diameter lamination rollers, emergency stop switch and foot switch. Laminator will process most popular substrates up to a thickness of 25mm (.98").

**Willamette 63 63" width \$2695**

### Powered Take-up Option \$595

New Willamette lamination supply reel and powered take-up reel for lamination backing paper, eliminates the challenges sometimes encountered by the passive take-up system.

Lamination Reel & Passive Take-up

# LIQUID LAMINATES

Clear coatings protect digital prints, vinyl & paint from abrasion, marring, weather and UV exposure while flexible enough for banners and vehicle graphics (even applied over rivets). *Painted surfaces* and *vinyl signage* also benefit from liquid lamination. Clear coats cut down on peeling by sealing the edges of vinyl graphics and lettering. Signs and banners look more unified and smooth. ClearShield is your first choice for all *non-water-sensitive* applications. ClearShield was created using state-of-the-art resins and ultraviolet inhibitors that protect the substrate, ink, and the clear coating itself. Use ClearJet on most substrates, including canvas, vinyl (enamel receptive and non-enamel receptive), banners, fiberglass, wood, metal, plastic, and paper. ClearJet is only for water-based inks.

Version	Price	Use on	How to Apply	Compatibility
<b>ClearShield Original</b> water-based	Gloss quart \$26.95, Gal \$80.85 Gloss 5 Gal \$359 SG quart \$27.95, Gal \$83.95 Matte quart \$30.45, Gal \$89.65	vinyl, banners, fiberglass, wood, metal, plastic, paper, solvent-based inks and most water-based paint systems	spray, pad or foam applicator, roller. Always work with <i>full, wet coats</i> .	for non-water-sensitive ink/media combinations
<b>ClearShield Type C</b> water-based for canvas	Gloss quart \$25.95, Gal \$68.50 SG Gal \$69.95 <i>this price limited to current stock only</i>	Waterproof canvas applications (highly flexible). Also suitable for micro porous substrates to reduce or eliminate pinholes.	Use all techniques, including most automated equipment. Always work with <i>full, wet coats</i> .	for non-water-sensitive ink/media combinations
<b>ClearJet Original A2000 Aerosol</b> solvent-based aerosol spray	Gloss spray \$10.95 SG spray \$10.95	most substrates, incl. canvas, vinyl (ELK & non ELK), banners, fiberglass, wood, metal, plastic, and paper	spray 3" - 6" from the surface, never turn your wrist, spray past the edge of the print & over-lap passes	for dye-based inks and water-sensitive ink/media combinations
<b>ClearJet Original Spray or Brush &amp; Roll</b> solvent-based	Gloss gallon \$49 SG quart \$19, SG gallon \$49 <i>this price limited to current stock only</i>	most substrates, incl. canvas, vinyl (ELK & non ELK), banners, fiberglass, wood & metal	<i>pad applicators, rollers or spray</i> , 6" - 9" from the surface, spray past the edge of the print & over-lap	for dye-based inks and water-sensitive ink/media combinations
<b>ClearJet Fine Art BR</b> solvent-based brush or roll for canvas	Gloss Gal \$69 SG quart \$25 <i>this price limited to current stock only</i>	made to penetrate the canvas, making the ink/media combination more flexible	<i>pad applicators or rollers</i> : 3/16" nap roller or a high-density white foam roller, work with full wet coats	for dye-based inks and water-sensitive ink/media combinations
<b>Cross Linking Agent CX-100</b>	4 ounce \$13.65 Quart \$109	improves resistance to water, chemical, impact, abrasion and humidity	add 10 cc per quart of ClearShield	use with all ClearShield products

per gallon	1 mil dry	.5 mils dry
ClearShield (all products)	480 sq. feet	960 sq. feet
ClearJet Type S (FA & Original)	370 sq. feet	740 sq. feet
ClearJet Type BR (FA & Original)	485 sq. feet	970 sq. feet

We generally recommend the following dry film thickness:  
*ClearShield Water-based Clears* - .7 to 1 mil dry film  
*ClearJet Solvent-based Clears* - .5 to 1 mil dry film

This chart shows you the theoretical coverage at 100% transfer efficiency. Fine Art versions tend to penetrate much more than standard versions so the surface film build will be lower, yet the protection will be excellent. We strongly recommend that you test before use. A test will immediately show you incompatibilities, including water sensitivity, ink jet receptive layer *mud cracks*, and ink bleeds. Generally, let the tested material dry for at least 24 hours. Evaluate the adhesion, flexibility, and visual appearance. Be realistic in your expectations and simulate the conditions the material will be exposed to.

**FROG JUICE CLEAR UV** is very glossy, totally synthetic and will not yellow. It achieves maximum hardness slowly over a period of 30 days, yet is ready to handle and place outdoors in 30 minutes. Frog Juice is normally thinned with mineral spirits, but can be thinned with naphtha, automotive acrylic enamel reducers, and lacquer thinners. Hot thinners can cause problems without proper testing.

	<b>spray</b>	<b>quart</b>	<b>gallon</b>
7000 Sunscreen Clear	\$8.95	\$25	\$94

**SEALIT PENS** paint pen w/1-Shot UV Clear **\$9.75 ea**  
 Edge sealer for SignGold & any adhesive backed vinyls

**3M VINYL EDGE SEALERS** **8oz**  
**3950 Scotchcal edge seal** for use on adhesive backed vinyls **\$19.95**

## APPLICATION FLUIDS

for pre-cleaning surfaces, eliminating bubbles,  
& allowing the repositioning of graphics

	4oz w/spray	8oz	quart w/spray	gallon
ACTION TAC	\$2.85		\$8	\$23
QUICK TACK	\$2.50		\$7	\$19
SPLASH concentrate makes one gallon		\$12 <sup>(12 @ \$9.95)</sup>		
WINDOW JUICE	\$3.55		\$10	

USE @ THESE TEMPERATURES

- Action Tac
- Splash
- Quick Tack
- Window Juice

Ready to use vinyl application fluid, excellent cleaner & prep agent. Allows the most time for repositioning.

Our least expensive, ready to use vinyl application fluid. Great cleaner with fast set-up & vanilla scent.

8oz vinyl application fluid concentrate makes one gallon. Most economical to use and ship!

Ready to use vinyl application fluid. *The solution* for glass applications. Very fast set-up time, great for very slick surfaces and cold temperatures.

# VINYL ACCESSORIES

## Vinyl Contour Trimming Tape

- 1/8" width
- Use for most wrap applications
- Conformable around bumpers, door handles, mirrors, etc
- Available in 150 ft or 300 ft rolls

Finish Line  
 150ft roll \$49.95  
 300ft roll \$79.95

With the Knifeless Finish Line Tape, you pull the tape and you get a nice clean cut edge. There is no way of ruining the vehicle. In the future if you pull the wrap off and you want to resell your vehicle, you won't have cut marks on it at all.

Instead of taking a knife to trim vehicle graphics, apply Knifeless Technology Finish Line Tape to do the cutting for you! Just apply the tape to the vehicle or boat, where you want your cut to be and use Knifeless Tech to cut straight on your line. Perfect for door handles, mirrors, window trim, head lights, tail lights, and wheel wells etc. It has made vehicle and boat wrap cutting easy!

Scan the QR code to instantly see the how to video!

## 3M VINYL PRIMER 94

8oz

**94 Tape Primer** used to promote adhesion of 3M adhesive backed vinyls on difficult surfaces or to promote conformability. Shake before using. Allow to dry before applying vinyl.

\$13.95

## WEBBER APPLICATION TAPE DISPENSER

Saves time and material applying application tape to vinyl flawlessly. An adjustable clutch allows you to set the tension of your application tape. The *only way* for one person to apply tape to large jobs. All tape tools include quick release & one 12in stainless steel squeegee.
